EXPERIENCE

Rutgers Biomedicine and Health Services, Newark, NJ — *IT Support Technician Intern*

July 2019 - August 2019

Data transfers of over 20 computers, data recovery of over 15 users, data wiping of over 200 hard drives, PC setups on over 20 users and organized the stockroom

Passaic Valley Sewerage Commission, Newark, NJ — *IT Support Specialist Intern*

May 2022 - September 2022

Feature updates on over 200 computers, strengthened security settings on over 100 printers, setup up new/current users with MFA, and worked over 20 trouble calls

EDUCATION

Rutgers University - Newark, Newark, NJ — *Bachelors of Arts*

September 2019 - May 2023 (anticipated)

Major: Computer Science

Minor: Mathematics

PROJECTS

NaPared — *Github*

As a student, I have created small projects for my own personal growth, as well as one project, *Student Navigation*, for a local school, Horton Elementary. I created a site for students to access their school apps in one centralized location. I also included, by demand, the school's live twitter feed.

Bouldering League — *Data Analytics*

During my Spring 2023 semester, I worked with a doctor on modernizing their Bouldering League competition. I made them a site with the ability to upload csv files to update the standings of the competitors.

SKILLS

HTML

CSS

Python

MySQL

PHP

AWARDS

Dean's List Spring 2021
semester (22nd rank)

LANGUAGES

English (native)

Spanish (receptive bilingual)

Career Goals

I believe that happiness comes from doing what you love the most. For me, it means spending the rest of my life looking at code. I love solving puzzles and finding solutions to problems that others might be coming across and I want that passion to drive my career in tech.
